The Long Term Care Service can help with the transfer of your patients from the hospital to a skilled nursing facility, assisted living or home care. We can anticoagulate your patient (start, continue, adjust coumadin or LMWH), give IV antibiotics, TPN, or blood products. We can take care of complex wounds and replace peripheral or central lines, do arterial or venous dopplers, and have x-rays or echos sent to you, and provide the follow-up.
